INTRODUCTION

Before starting any introduction first, we need to know what is NGO, NGO is a non-government organization which works for the betterment and upliftment of the social, economically and politically weaker sections of community to bring then in the main stream of society towards more improved and developed way of living and existence. it synchronizes the working of NGO. it performs different tasks for solving problems and development of society.

OBJECTIVE

This website or web application which will cover all the information related education, skills training, support services, and advocacy to women and girls. NGO activities include providing scholarships to girls, supporting schools that cater to girls, providing skills training to women and girls, providing support services to women and girls who have been victims of violence, advocating for the rights of women and girls, and partnering with other organizations to achieve its goals. different projects they worked ongoing projects, donor details and different activities/events and Photogallary of NGO activities.

KEY FEATURES

- **Collecting the donation information:** built-in donation forms are proven to drive more donations than externally linking forms - payment integration for collecting donations online.
- **Interactive member map:** an interactive map is a great engagement tool. sort and categorize members into a member directory and map so that members can easily search for others to connect with. make sure it's mobile-friendly, too, so that users can access it whenever they need it!
- **An events page :** by making an easily-accessible events page, members and donors will know exactly how they can stay involved with your NGO
- **An updated blog:** a blog is a great way to accomplish NGO activities. - it provides you with an outlet to share educational content and powerful stories that evoke emotion in readers. - determine what goal you'd like your blog to accomplish. then, develop content that communicates your vision and will push you along that path.
- **Social sharing options:** your online engagement strategy may start with your NGO website, but it certainly doesn't end there. in order to fully extend your reach, you need to expand your efforts to social media by featuring social sharing buttons on your website.

LITERATURE SURVEY

EXISTING SYSTEM:

- Existing system is offline mode, where all works done are hidden from the people.
- Without an online platform, NGO may struggle to effectively communicate with potential donors, volunteers, and beneficiaries.
- If website is not available, it limits the visibility of the NGO and its activities, making it harder to reach people.
- Maintaining paper reports in hard copy is crucial. potential challenges in ensuring the security of sensitive information without online security measures.

PROPOSED SYSTEM:

- The objective of the proposed system is to provide time efficient, user friendly, reliable, error free and maintenance free system.
- This website or web application which will cover all the information of our NGO activities such as legal awareness, health camps, environment, human rights, schools, consumer protection.
- By establishing website, the NGO can reach a global audience, increasing awareness and potentially attracting support from diverse geographical locations.
- The website enables continuous availability of information, providing stakeholders with around-the-clock access to updates, events, and resources, enhancing communication and transparency.
- Real-time updates: the website allows for instant dissemination of news and updates, keeping supporters informed about the NGO'S activities, achievements, and ongoing projects in real time.

TOOLS AND TECHNOLOGIES

HARDWARE REQUIREMENT'S

- Operating System: windows 11
- Processor: 12th gen intel(r) core(tm) i5-1235u 1.30 ghz
- Ram: 1gb & above
- Hard Disk : atleast 1gb

SOFTWARE REQURIMENT'S

- Programming Languages: java, JavaScript
- Database: MySQL
- Frontend: HTML, CSS, bootstrap
